

Salewa

Salewa Speed 240

With the launch of the Speed 240 Salewas bringing one of the lightest climbing harnesses in the world onto the market. It weighs no more than 240g. The unique window style construction and unusual press and stick mechanism on the waistband and leg loops combine to reduce weight and improve breathability. There are no compromises on the comfort when hanging.

Salewa Compact Crampon

This crampon measures only 21cm long when you push the front and back part over each other. The huge advantage is that you can easily find space for the Compact Crampon in its handy storage bag inside the backpack. You no longer have to attach it to the outside, which means no more bothersome dangling from the rucksack or bloody elbows!

Salewa Piuma 205 comp

Weighing in at 205g the Piuma 205 comp is the lightest tested and certifies alpine helmet in the world. Ten air vents will help keep a cool head in precarious situations. The polystyrene hard foam guarantees top protection for the head. With the help of a Velcro fastening the helmet can be adapted to all head sizes-comfortable to wear and an optimum fit.

Salewa MTN Trainers

The MTN Trainers are the new all-round model for the via ferrata and approach. MTN trainers not only have the 3F Evo system, they also come with their own unique sole construction. The areas around the toes and heel are reinforced for additional stability. The central part is made of softer material to guarantee the best comfort.

Salewa Open Flex AlpinDonna

The Open Flex AlpinDonna is a specially designed sleeping bag for women, which arouses enthusiasm with its unique features, that allow one to walk, sit and keep warm outside of a tent! Armslits allow maximum freedom of movement and the foot-box can be attached to the side so it doesn't get in the way when walking.

Salewa Hot Flex AlpinDonna

Working together with Therm-ic and the magazine Sportsfreundin Salewa have developed the first worldwide heatable sleeping bag.

The separate foot chamber is heated in three steps by the push of a button. This technique is integrated in the AlpinDonna sleeping bag, which only weighs 200 grammes, is waterproof and maschine washable. All of the Term-ic rechargers, that can also be used for skishoes, are compatible with the Hot Flex System.

Salewa Darban Jacket

Darban is a feminine and ergonomic-cut Windstopper Softshell Jacket. It is ultralight, wind and water resistant with superb breathability. The hood adjustment at the neck gives additional protection. Side vents and the lightly roughed lining make this garment snug and comfy.

Altitude AlpinDonna

Salewa's new comfortable backpack carrying systems are known as Airstream+ and TCS (Torque Control System). The versatile engineered Altitude range for women with Airstream+ offers the best breathability possible with the highest levels of comfort. Although this backpack sits close to the back, numerous air vents in a sequence of ridges ensure uninterrupted circulation of air, even when carrying heavy loads.

Deuter

Deuter's new, extended travel range includes the extremely sturdy Traverse Trolleys, sporty, rolling duffel bags and all-purpose sports bags packing it all in.

Deuter Ascent

The athletic Ascent line (60 l, 80 l and 110 l) is designed to survive the most rugged travelling conditions. The rolling duffels come with two positions, double grab telescoping handle, one big main compartment with practical mesh pouches and interior straps.

Deuter Traverse 30

Meeting the carry-on requirements of the IATA, Deuter's sporty and stylish Traverse 30 is the ideal short trip companion. With its narrow shape, the wheeled bag won't get stuck in train or plane aisles. It has a convenient padded laptop pouch within easy reach: you do not have to open the bag fully to get to your PC.

Deuter Relay

The multi-purpose Relay duffels (60 l, 80 l, 110 l) complement Deuter's new travel range. The lightweight bags in three fresh colours offer plenty of space for all your gear with convenient pockets for fast access.

GoLite

„Do More With Less“

GoLite Jam2

The Jam2 backpack from GoLite's Ultra Series is a 50 litre hydration compatible pack that reduces to 21 litres when compacted using GoLite's compPACKtor compression system. The PU coated Dyneema Gridstop nylon which is 15 times stronger than steel, ensures its strength and durability with other features including a large front pocket with watertight zipper, a comfortable foam back system, hip belt wings, space mesh shoulder straps with Brock foam padding and an adjustable sternum strap. The Jam2 is available in men's and women's specific styling to ensure the correct fit and is available in a choice of 3 colours for each gender.

GoLite Adrenaline

The Adrenaline sleeping bag series achieved the 2008 Editors Choice from Backpacker magazine in the US and promise prominently in the 2009 range. There are 6 bags within the Adrenaline series with the lightest bag weighing in at only 540 grms for the women's model. Each model features Pertex Endurance fabric around the hood and foot boxes (AridZone) to prevent moisture penetration and an 800 fill goose down for excellent warmth to weight and high compressibility. Each Adrenaline bag features a centre zip for increased thermal performance. The bags also have a mummy shape, and trapezoidal foot box that provides excellent comfort. Adrenaline bags have a comfort rating from +4 degrees C to -18 degrees C.
