

Robens/Outwell

Typhon

New to the Xtra Lite series from Robens is the Typhon. Ultra-light 20 denier fabric, DAC Featherlite NSL poles and the sophisticated design make for a wind-stable two-person tent weighing just 1.8 kg. With its two short poles and external arch frame with clip fastener, the tent is quick to set up, offers plenty of room for storing gear under the flysheet, and excellent ventilation – large protected vents that can be adjusted from inside the tent can be found at each end of the tent.

Montana 6P

The Montana 6P from Outwell is in a class of its own amongst family camping tents. Thanks to its high-quality materials and workmanship, its well-conceived and extremely stable structure, along with the comfortable space it has to offer, this tent has won a host of international awards. Newly introduced for 2012, the rounded 'panorama front' with its generous tinted windows providing the best views, is a further superb innovation that will also feature on several other Outwell models.

adidas

TERREX Fast R

Despite their light weight, TERREX FAST R Mid and Low still offer all the reliability and stability you need for fast climbs. The TRAXION sole with its newly developed Continental rubber compound guarantees the necessary ground adhesion at high speeds and in all weathers. Grip is exceptional in wet or dry conditions. This level of security is also supported by advanced three-dimensional FORMOTION technology in the heel zone. Two overlapping plates slide forward, back and to the side depending on ground conditions and the angle of contact.

This reduces heel-to-toe velocity on fast descents, equalizes bumps and minimises impact on the joints. The athlete is more in control because the foot is positioned lower in the TERREX Fast R and can flex naturally being closer to the ground.

TERREX Gore-Tex Active Shell Jacket

The TERREX Active Shell Jacket fulfils your specifications if you are into athletic speed challenges in the mountains, optimum moisture control without dispensing and guaranteed lasting weather protection. It is a minimalistic jacket which is extremely lightweight and has a small packing size. The brand-new three-layer material with proven Gore-Tex weather protection offers almost Soft Shell breathability and a perfect next-to-skin comfort. As with all TERREX products, the Active Shell Jacket provides an athletic and functional fit and optimum freedom of movement thanks to the three-dimensional FORMOTION cut.
